The winter western boundary current of the South China Sea: physical structure and volume transport in December 1998
LI Li, GUO Xiaogang, WU Risheng

Evaluation on data assimilation of a global high resolution wave-tide-circulation coupled model using the tropical Pacific TAO buoy observations
SHI Junqiang, YIN Xunqiang, SHU Qi, XIAO Bin, QIAO Fangli

Numerical simulations of rip currents off arc-shaped coastlines
WANG Hong, ZHU Shouxian, LI Xunqiang, ZHANG Wenjing, NIE Yu

Turbulent mixing above the Atlantic Water around the Chukchi Borderland in 2014
ZHONG Wenli, GUO Guijun, ZHAO Jinping, LI Tao, WANG Xiaoyu, MU Longjiang

Impact of polar lows on synoptic scale variability of Atlantic inflow in the Fram Strait
SUN Ruili, GAO Guoping

On the subtropical Northeast Pacific mixed layer depth and its influence on the subduction
XIA Ruibin, LIU Chengyan, CHENG Chen

Potential effects of subduction rate in the key ocean on global warming hiatus
CHEN Xingrong, LIU Shan, CAI Yi, ZHANG Shouwen

The long-term prediction of the oil-contaminated water from the Sanchi collision in the East China Sea
YIN Liping, ZHANG Min, ZHANG Yuanling, QIAO Fangli

The deep structure of the Duanqiao hydrothermal field at the Southwest Indian Ridge
SUN Chaofeng, WU Zhaocai, TAO Chunhui, RUAN Aiguo, ZHANG Guoyin, GUO Zhihi, HUANG Enxian

Wave flume experiments on the contribution of seabed fluidization to sediment resuspension
ZHANG Shaotong, JIA Yonggang, WANG Zhenhao, WEN Mingzheng, LU Fang, ZHANG Yaqi, LIU Xiaolei, SHAN Hongxian
Marine Technology

88.................. A novel algorithm for ocean wave direction inversion from X-band radar images based on optical flow method
WANG Li, CHENG Yunfei, HONG Lijuan, LIU Xinyu

Marine Information Science

94.................. A statistical distribution of quad-pol X-band sea clutter time series acquired at a grazing angle
WANG Yunhua, LI Qun, ZHANG Yanmin

103................. Estimating significant wave height from SAR imagery based on an SVM regression model
GAO Dong, LIU Yongxin, MENG Junmin, JIA Yongjun, FAN Chenqing

111................. A routine operational backscattering coefficient regrouping algorithm for a HY-2A scatterometer
ZOU Juhong, LIN Mingsen, ZOU Bin, GUO Maohua, ZHANG Yi
